

Sub-Surface Stormwater Storage System

Product: Saddle Port Kits

StormTank[™] is designed without any internal walls to allow full access. To complement this open structure and provide an access for flush hoses and closed circuit cameras; Brentwood offers a saddle connection for direct connection through any inlet or outlet pipe.

To simplify the process, Brentwood has developed Saddle Port Kits. These kits include the necessary port, flexible tap saddle, 45° elbow and surface box; with the riser pipe being contractor-supplied.

Technical Data

Nominal Specifications

| Model | Flexible Tap Saddle | PVC Elbow | Access Box (Pencell Part #) |
|-------|---------------------|-----------|-----------------------------|
| SPK-6 | 6" Lateral | 6" - 45° | DT-2-1324PC |
