

Silt Fence

We offer a wide variety of high quality woven and nonwoven geotextile silt fence fabrics in easily manageable 100' pre-assembled rolls or economical bulk rolls. Choose from a variety of styles and specifications to meet your needs, including preprinted fencing with your logo.

Contractor Grade Silt Fence

Nearly 70% of all construction jobs that require silt fence do not specify the type of fence that must be used. Save money by using quality contractor grade silt fence.

- Economical 36" height
- 1-1/2" X 1-1/2" (nominal) hardwood stakes
- Stakes spaced 10' on center
- 11 stakes per 100' of fabric
- Also available with orange fabric

D.O.T. Grade Silt Fence

We carry silt fence that is currently approved or certified by many state agencies and we can supply silt fence that meets state D.O.T specifications.

- Specified higher quality fabrics in 24" or 36" widths
- Specified stake size 1-1/2" X 1-1/2" (nominal)
- Stakes spaced 6' on center

WBSF Silt Fence

WBSF (woven belted silt fence) addresses the trapping efficiency and stormwater release required for the success of the practice. Five (350 lb.) belts are woven within the fabric, making this silt fence one of the strongest on the market.

- Internal belts used as staple points allow fabric to hold maximum loads without additional support
- No wire or net required
- 3' X 100' rolls with pre-attached stakes 6' on center

BSRF Priority 1 Silt Fence

BSRF Priority 1 green band heavy-duty silt fence is available in 36" wide, nonwoven spunbonded polyester fabric with internal scrim. The system utilizes wood stakes and a specific method of attachment. The BSRF, when installed as specified, produces a proven system with superior filtering capabilities in slurry conditions.

- Green band identifies sensitive areas
- Fabric attached with bonding strips
- Internal scrim for added support
- Exceeds federal guidelines with 97.3% efficiency (ASTM-D-5141)
- 3' X 48' with pre-attached stakes 4' on center

BSRF Priority 2 Silt Fence

BSRF Priority 2 black band medium-duty silt fence is available in 36" wide nonwoven spunbonded polyester fabric. The system utilizes wood stakes and a specific method of attachment. The fabric, when installed as specified, produces a proven system with superior filtering capabilities in slurry conditions. The system shall be used as a vertical interceptor of sediment transported by overland flow on construction sites.

- Black banding for use in less sensitive areas
- Fabric attached with bonding strips to 1-1/8" X 1-1/8" posts
- Bonding strips prevent tears
- Exceeds federal guidelines with 98.5% efficiency (ASTM-D-5141)
- Designed for sheet flow
- 3' X 100' with pre-attached stakes 6' on center

Georgia Type C (C-POP) Silt Fence

C-POP (polypropylene on polypropylene) silt fence system is designed to be used as a temporary sediment barrier in areas where runoff velocities are high. It is a great option when high-performance erosion control is warranted.

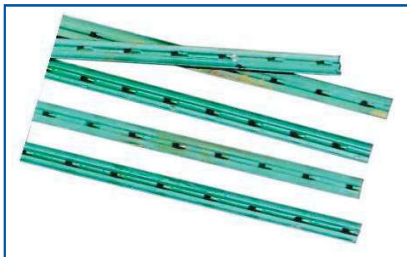

- High-flow woven monofilament geotextile sewn together with heavy-duty high performance polypropylene reinforcement grid
- 2" X 2" X 48" hardwood posts
- 3' X 48' rolls with pre-attached stakes 4' on center

Orange Silt Fence

Orange silt fence is in stock and available in 36" high fabric with 1-1/2" X 1-1/2" (nominal) stakes spaced 10' on center. It can be used as tree barricade with the added benefit of silt fence.

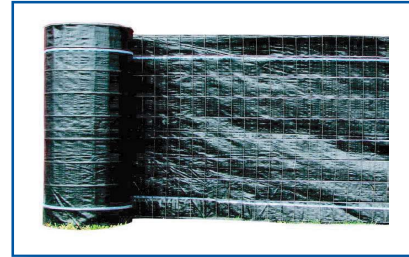

Steel T-Posts

For added support, we sell 5' T-posts with no kick plate for most wire-backed silt fence, safety fence, and staked turbidity barrier applications.

- OSHA orange safety caps available

Wire-Backed Silt Fence

In addition to the D.O.T. silt fence available, we also offer a wire-backed option. A 14 gauge wire mesh with 2" X 4" openings is attached to D.O.T. grade fabric. The fabric is 36" high with 24" or 36" high wire.

Biodegradable Silt Fence

We carry biodegradable burlap silt fence for temporary erosion or perimeter control. With its filtering capability, it is also ideal for capturing turbidity particulates when used in conjunction with polymers.

- Available in 36" high 10 oz. burlap fabric
- 1-1/2" X 1-1/2" (nominal) 48" high oak posts
- 3' X 100' rolls with stakes spaced 6' on center

Wood Stakes

We stock high-grade wood stakes that can be used to assemble your own silt fence, stake hay bales, or for perimeter markers. These stakes have points for easy driving.

- 24" and 48" lengths
- 48" survey stakes also available
